

Sending a Message for Help

Specific information must be provided to Logistics and the Infirmary when reporting an emergency. Stay calm and know the emergency procedures. It is important that each participant write on the Note Section of their map the answers to the following list of questions. BE CONCISE, going for help to the nearest staffed camp.

- Subject's name
- Expedition number
- Exact location - mark the location with an X on the map and describe in detail - use grid coordinates as best as possible
- Time of incident - how long the condition has persisted and whether there are intervals of occurrence
- Exactly what happened - what caused the event
- What is wrong - describe all symptoms and conditions in detail: subjects temperature, breathing rate and pulse are most important
- Level of consciousness - Alert x4 (name, time, place, incident), verbally responsive, pain responsive only, unresponsive
- Signs and symptoms of present illness or injury, allergies, medication, history of relevant illness, last meal and drink (INS) and last restroom use (OUTS), events illness or injury
- Treatment given so far
- Anything else that may seem important

Cell Phone Use at Philmont Scout Ranch

Cell phones are permitted in the Backcountry. There are some uses of some phones that enhance a Backcountry experience, such as the camera, journal and some applications. Using a cell phone to phone and/or text home, friends, or work is **STONGLY DISCOURAGED**. Many areas of Philmont have no cell coverage. There is no opportunity to recharge a cell phone once you have left Base Camp.

If a cell phone is used for an emergency, please use the following process:

- Phone Philmont Scout Ranch: 575-376-2281 to report an emergency. State that this is an emergency and you need to talk to the Logistics Radio Room
- Give your expedition number
- State who is calling and the cell # - if the phone has an indicator of battery life, please state how much battery time you have
- Briefly, accurately, and calmly describe the emergency situation
- Accurately state the location of the emergency - please be prepared with all other emergency information requested in the list above "Sending a Message for Help"
- You may be directed to turn off your phone and call back at a specific time in order to save battery life
- Please remain at your current location where you have cell coverage, and await further instructions

If you receive an emergency call phone call while at Philmont, please contact Logistics Radio Room at 575-376-2281 to initiate support from Philmont.

- 7:30am
- New Trail Construction

2024 PHILMONT ADVENTURE ITINERARY

Itinerary 12-34 Super Strenuous (minimum program time) - 90 miles

The program filled trail will give you a chance to pass over Wilson Mesa, climb Baldy Mountain, and hike the Tooth of Time! Start your trek at the Ute Park Trailhead and go on up to Misteloe. Stop for some Challenge Course and team building exercises before spending the night at Baldy Skyline Camp. The next few days has you venturing deeper into the mining history of Baldy Country. Stop in at Baldy Town for resupply and some mining history before heading over to French Henry for a mine tour. The next morning has you hiking through Copper Park as you make your way up Philmont's highest peak. Hike to the Baldy ridge and hang your shovels. Then hike the northern shoulder of Baldy Mountain to the summit! Return to your packs and continue to Upper Greenwood. Enjoy the downhill hike to Rich Cabins where a welcoming homestead and evening of music and stories await you. Climb Wilson Mesa, enjoy the view, and venture on to visit the loggers at Puabano for some Crosscut Saw action! Elkhorn Camp is your destination for the for the night, before you make your way over the Dean Skyline to Dean Cow. Your next stop is Harlan, where you will have the chance to reload shotshells and shoot 12-gauge shovels. The next leg of your journey is Cimarroncito, where you will get to experience rock climbing and rappelling with an amazing staff. Make your way through the Demonstration Forest the next morning, where you can learn about forestry from a trained expert! Camping at Clarks Fork will let you test your roping skills, enjoy a chuckwagon dinner, and cap off the evening with a cowboy campfire. The sun to wake up early. If your water bottles, and fit the trail towards Shavers Peak and the Tooth of Time. Enjoy the famous peak and reflect on your journey as you make your way into base camp. We all made it!

Day	Camp	Miles	Gain	Loss	Program Features	Food Pickup

Universal Transverse Mercator (UTM) Guide

The UTM projection is a navigational grid "projected" onto the Earth's curved surface to aid in pinpointing your location. Most GPS devices can be set to North American Datum of 1983 (known as "NAD 83", the map datum Philmont uses) to determine your position on the grid. This grid can also be used to plug in future waypoint map coordinates into a GPS unit.

The grid is read from left to right, then bottom to top in meters to get an X,Y (Easting, Northing) position. Each square on the map's grid is exactly 1,000 meters (1 kilometer), so this grid can be used to determine distance.

The sub-tics on this grid represent 250 meters.

Reading from west to east, the red star on this map is at:

492830 (Easting)
4048730 (Northing)
or
492830, 4048730

Scale: 1:31680 Contour Interval: 50 feet
2 inches = 1 mile = 1.6 kilometers

Geographic Coordinate System: GCS North American 1983
 Projection: North America 1983 UTM 17N 12

Recreational GPS units may use the Latitudinal Zone Designator 13S
